

YARRABEE & CASTLEMAINE STONE

BARWON RANDOM

STONE WALL CLADDING

BARWON

Barwon natural stone wall cladding is a beautiful yet hard and durable quartz which has soft gold/wheat tones over a light grey base.

Components	Barwon comes in flat pieces used for the face surface of the wall and L shaped corner pieces for the corners of the wall
Profile	Walling pieces are random (organically irregular) Corner pieces are random (organically irregular)
Dimensions:	Walling stone is random sized pieces with a diameter of approx 200-400mm. Corner pieces are "L" shaped with one side 100-150mm, the other side 150-250mm and a height of 100-250mm
Thickness:	20-40mm
Weight:	Walling flats = 70kg per square metre Corners = 25kg per lineal metre
Quantities:	Walling flats = 10 square metres per crate Corners = 25 lineal metres per crate
Ordering:	Sold in quantities of 1 square metre or 1 lineal metre lots Note: 1 lineal metre equates to approximately 0.3m ² of coverage Both walling flats and corners are actively stocked
Note:	If you are installing your stone without using grout joints, we advise adding a minimum of an additional 20-25% to account for any wastage. This will give the installer the flexibility to cut and shape the stone to achieve butt-jointed joints required for this look. Furthermore, we recommend the installer to unpack each crate of stone and utilize a mixture of the sizes provided. Smaller or unused pieces cannot be exchanged for larger ones. It is the installer's responsibility to make use of all the sizes provided.
