

YARRABEE & CASTLEMAINE STONE

BOGONG STRATA

STONE WALL CLADDING

BOGONG

Bogong is a versatile granite wall cladding which comes in a mid to dark grey shade with hints of cool blue and splashes of warmer soft rusts and beige. The strata (linear) format adds a horizontal dimension, making it an eye-catching feature stone that enhances the overall aesthetic appeal. Consider the beauty and versatility of Bogong to complement your next contemporary or traditional space.

Components	Bogong comes in flat pieces used used for the face surface of the wall and L shaped corner pieces for the corners of the wall
Profile	Walling pieces are generally flat on top and bottom Corner pieces are random (organically irregular) with general flat edges
Dimensions:	Walling stone is random lengths 150-600mm long x 150-300mm high. Corner pieces are "L" shaped with one side 100-300mm, a return 100-200mm and a height 40-120mm
Thickness:	20-40mm
Weight:	Walling flats = 70kg per m2 Corners = 25kg per lineal metre
Quantities:	Walling flats = 10 m2 per crate Corners = 25 lineal metres per crate
Ordering:	Sold in quantities of 1 square metre or 1 lineal metre lots Note: 1 lineal metre equates to approximately 0.3m2 of coverage Both walling flats and corners are actively stocked
Note:	If you are installing your stone without using grout joints, we advise adding a minimum of an additional 20-25% to account for any wastage. This will give the installer the flexibility to cut and shape the stone to achieve butt-jointed joints required for this look. Furthermore, we recommend the installer to unpack each crate of stone and utilize a mixture of the sizes provided. Smaller or unused pieces cannot be exchanged for larger ones. It is the installer's responsibility to make use of all the sizes provided.
