

YARRABEE & CASTLEMAINE STONE

DUNOLLY MODULAR

STONE WALL CLADDING

DUNOLLY

Dunolly Modular wall cladding in the classic ashlar pattern. This pattern enhances the stone's natural beauty, featuring light tones with silver veins and highlights. Use it as wall cladding or a feature to add sophistication to any space. This durable and versatile stone is suitable for both residential and commercial projects. Pair with an off-white grout for stunning contrast. Elevate your space with the timeless beauty of Dunolly's ashlar pattern.

Components	Dunolly comes in flat pieces used for the face surface of the wall and L shaped corner pieces for the corners of the wall
Profile	Walling pieces are random sized rectangles Corner pieces are random sized
Dimensions:	Walling stone is random lengths 150-450mm long x 10-200mm wide. Corner pieces are "L" shaped with one side 100-300mm, a return 150-250mm and a height 100-250mm
Thickness:	20-40mm
Weight:	Walling flats = 70kg per m ² Corners = 25kg per lineal metre
Quantities:	Walling flats = 10 m ² per crate Corners = 25 lineal metres per crate
Ordering:	Sold in quantities of 1 square metre or 1 lineal metre lots Note: 1 lineal metre equates to approximately 0.3m ² of coverage Both walling flats and corners are actively stocked
Note:	If you are installing your stone without using grout joints, we advise adding a minimum of an additional 20-25% to account for any wastage. This will give the installer the flexibility to cut and shape the stone to achieve butt-jointed joints required for this look. Furthermore, we recommend the installer to unpack each crate of stone and utilize a mixture of the sizes provided. Smaller or unused pieces cannot be exchanged for larger ones. It is the installer's responsibility to make use of all the sizes provided.
