STONE WALL CLADDING

# MAWSON

Mawson random natural stone walling is a versatile cladding perfect for any landscape or building project. The light-colored cladding has occasional hints of amber and brown tones, providing a subtle contrast that adds visual interest to any space. Whether you're building a new home or updating your landscape, Mawson Random wall cladding is a durable and timeless choice that's sure to impress.

<b>Components</b>	Mawson comes in flat pieces used used for the face surface of the wall and L shaped corner pieces for the corners of the wall
<b>Profile</b>	Walling pieces are random (organically irregular) Corner pieces are random (organically irregular)
<b>Dimensions:</b>	Walling stone is random sized pieces with a diameter of approx 200-400mm. Corner pieces are "L" shaped with one side 100-150mm, the other side 150-250mm and a height of 100-250mm
<b>Thickness:</b>	20-30mm
<b>Weight:</b>	Walling flats = 47kg per square metre Corners = 15kg per lineal metre
<b>Quantities:</b>	Walling flats = 15 square metres per crate Corners = 40 lineal metres per crate
<b>Ordering:</b>	Sold in quantities of 1 square metre or 1 lineal metre lots Note: 1 lineal metre equates to approximately 0.3m <sup>2</sup> of coverage Both walling flats and corners are actively stocked
<b>Note:</b>	If you are installing your stone without using grout joints, we advise adding a minimum of an additional 20-25% to account for any wastage. This will give the installer the flexibility to cut and shape the stone to achieve butt-jointed joints required for this look. Furthermore, we recommend the installer to unpack each crate of stone and utilize a mixture of the sizes provided. Smaller or unused pieces cannot be exchanged for larger ones. It is the installer's responsibility to make use of all the sizes provided.
